

1     **WHAT IS CLAIMED IS:**

2             1. A tool with colored patterns comprising:

3             a tool body having a surface; and

4             at least one colored pattern layer applied to the surface of the tool body

5     and having:

6             an adhesive layer to be attached to the surface of the tool body;

7     and

8             a printed dye layer applied to the adhesive layer.

9             2. The tool as claimed in claim 1, further comprising at least one

10    composite layer and at least one inner adhesive layer mounted between the

11    corresponding at least one colored pattern layer and the surface of tool body,

12    wherein

13             the at least one inner adhesive layer attached to the surface of the

14    tool body; and

15             the at least one composite layer attached to the at least one inner

16    adhesive layer.

17             3. The tool with colored patterns as claimed in claim 1, further

18    comprising a transparent film applied to the at least one colored pattern layer to

19    keep the at least one colored pattern layer from being damaged.

20             4. The tool with colored patterns as claimed in claim 2, further

21    comprising a transparent film applied to the at least one colored pattern layer to

22    keep the at least one colored pattern layer from being damaged.
